How to Download & Install the Intermec HTML5 Browser

Q: What is the Intermec HTML5 Browser?

A: Intermec HTML5 Browser provides a free open-platform application environment for Intermec computers. You can now run the same cross-platform web applications on an Intermec computer, as well as iOS and Android devices. Intermec HTML5 also lets you run applications while the computer is connected to the web or while it is offline.

Q: What Intermec computers support the HTML5 Browser?

A: Intermec HTML5 Browser ships pre-loaded on these Intermec computers:

- CK70
- CN50
- CN70
- CN70e
- CS40

You can also download and install the Intermec HTML5 Browser on these computers:

- CK3
- CK71
- CV41

Q: How do I install the Intermec HTML5 Browser?

A: How you install the Intermec HTML5 Browser depends on whether the .cab file ships on your Intermec computer or if it needs to be downloaded from the Intermec website.

If the Intermec HTML5 Browser .cab file ships on your computer, you can install the application by:

- Scanning a ScanNGo bar code (WEH 6.5 units only)
- Navigating to the file manually

If the Intermec HTML5 Browser .cab file does not ship on your computer, you need to:

1. Download Intermec HTML5 Browser from the Intermec website.
2. Copy the .cab file to your Intermec computer or use SmartSystems to install it on your Intermec computer.
3. Scan the ScanNGo bar code or navigate manually to the file to install it on your computer.

Q: How do I install Intermec HTML5 Browser using the ScanNGo bar codes?

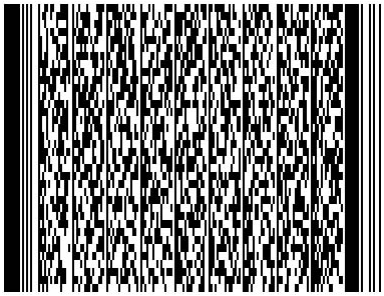
A: The easiest way to install the Intermec HTML5 Browser on your computer is to scan the ScanNGo bar codes. You can use this installation method for both computers that ship with the .cab file pre-loaded on them and for computers that you copied the .cab file to the root of the Flash File Store.

You cannot use the ScanNGo bar codes to install the HTML5 Browser on a CV41. You must manually install the .cab file on the CV41.

To install the HTML5 Browser

1. Scan this bar code:

2. Then scan this bar code:



3. Follow any instructions on the computer.

Q: How do I manually install the HTML5 Browser?

A: You can install the factory-loaded HTML5 Browser by navigating to the .cab file on your computer and tapping it. Due to the size of the HTML5 Browser files, Intermec recommends that they be installed to the device. By default, the HTML5 Browser is installed into the Program Files folder on your computer.

To navigate to the .cab file and install the HTML5 Browser:

1. Tap Start > File Explorer.
2. From File Explorer (My Device), tap Flash File Store (or System if you have a CV41).
3. Tap INhtml5.cab (or INhtml5_CE6.cab). You are prompted to select where to install HTML5.
4. Select to install HTML5 on the device or in the flash file store. Intermec HTML5 Browser installs on your computer.

Q: How do I download Intermec HTML5 Browser from the web?

A: If you have a CK3 Series computer, a CK71 computer, or a CV41 computer, you can download the Intermec HTML5 Browser from the Intermec website and copy it to your Intermec computer or use SmartSystems to install it. You can also download Intermec HTML5 Browser from the web for CK70, CN50, CN70, CN70e, or CS40 computers that were manufactured before the .cab file came pre-loaded on the computers.

To download the Intermec HTML5 Browser from the Intermec website:

1. On your PC, go to the Intermec website at www.intermec.com.
2. Navigate to the product page for your Intermec computer.
3. Click the Downloads tab.
4. Click the link to download the correct version of the Intermec HTML5 Browser for your computer.
5. On the Downloads Login page, login or create a new account.
6. Follow the instructions to download the Intermec HTML5 Browser bundle to your PC.

Q: How do I install Intermec HTML5 Browser using SmartSystems?

A: You can use the SmartSystems console to install the Intermec HTML5 Browser on your computer. For more information, visit the Intermec website at www.intermec.com/SmartSystems.

To install Intermec HTML5 Browser using the SmartSystems console:

1. Follow the installation wizard to load the application onto the SmartSystems console.
2. From the SmartSystems console, drag the application to each computer in your network or to a group of computers in a folder.

Q: How do I copy the HTML5 Browser .cab file to the Intermec computer?

A: If you are not using SmartSystems, you can use ActiveSync or another synchronization software tool to copy the .cab file to your Intermec computer.

To copy the HTML5 Browser .cab file to your Intermec computer:

1. On your PC, double-click the Intermec HTML5 Browser bundle and follow the prompts to extract the files. By default, the files are extracted to C:\Program Files\Intermec\SmartSystems\ss_lib\Software\INhtml5_XXXX_x.x.x.x where XXXX is the operating system and x.x.x.x is the version number.
2. Use synchronization software to copy the INhtml5.cab file to your Intermec computer.
