

HOW LABS ARE MANAGING SPECIMEN COLLECTION TO DELIVER FAST RESULTS

Amid the current health crisis, the need for timely lab testing is greater than ever before.

SITUATION

Hospital and outpatient testing laboratories are working around the clock to process specimens and need error-free courier management workflows to efficiently handle the surge in demand. It's essential for lab administrators to have full visibility and tracking capabilities to document specimens throughout the courier process, from pickup, to delivery, and everywhere in between, to deliver accurate and fast results. Equipped with the right mobility and third-party software solution, labs can process tests and deliver results quickly and efficiently, avoiding missed specimens and empowering clinicians to provide critical care.

SOLUTION

Honeywell CT40 and CT60 Mobile Computers are designed for mobile workers that require real-time connectivity to business-critical applications. The CT40/CT60 are compact, and can easily scan and capture data from barcodes on specimen bags or requisitions and use LTE cellular data to transmit the data in real time. Built on the Mobility Edge™ platform, the CT40/CT60 mobile computers provide guaranteed compatibility through Android R and OS support through 2028. With a secure mobile device, specimen and site visit information is transmitted safely and securely from the hospital to the lab.

Medical Courier Elite (MCE)* is a custom third-party specimen tracking and courier software application that offers a comprehensive cloud-based solution designed specifically for medical lab specimen tracking and courier route management utilizing barcodes and GPS. MCE optimizes the
