The Honeywell CT60 XP mobile computer is designed for enterprises that require anywhere, anytime, real-time connectivity to business-critical applications and fast data capture capabilities in a highly durable, long-lasting form factor built for maximum uptime and productivity out in the field or on the selling floor.

Built on the Mobility Edge™ platform, the CT60 XP mobile computer offers an integrated, repeatable and scalable approach based on a common hardware and software platform – unleashing customers from constraints faced today around integration and inflexible technologies without sacrificing enterprise security, reliability, performance or management features.

Juggling multiple devices across the enterprise introduces time- and cost-intensive complexities for Enterprise IT to manage and maintain. The CT60 XP mobile computer, enables customers to accelerate provisioning, certification and deployment across the enterprise. It also offers an extended product lifecycle across five generations of Android™ to maximize return on customer investment and provide a lower TCO. And it’s validated by Android Enterprise Recommended (AER), a Google-led initiative that helps businesses confidently select, deploy and manage the Android devices and services best suited to their enterprise needs.

The CT60 XP mobile computer is packed with features to keep workers connected and productive all day long. The industry-leading advanced network connectivity facilitates large file transfers, video streaming and quick remote access to business applications with enough battery power to last an entire shift. Fast, accurate FlexRange™ based scanning and data capture is possible even on the most damaged barcodes. The rugged design withstands accidental drops and falls, yet is ergonomic and lightweight for comfortable, everyday use. A vivid 118 mm (4.7 in) Corning® Gorilla® Glass 5 touchscreen display, with 500 nits maximum brightness, is easily read indoors and out, and can be used with finger, glove or stylus.
