

EZConfig Cloud for Scanning 5.0

Device Configuration Software Service

Honeywell's EZConfig Cloud for Scanning www.ezconfig.honeywell.com is a free software-as-a-service (SaaS) utility that facilitates fast and easy setting of one-to-one, Honeywell-branded barcode scanner configurations and firmware updates. EZConfig Cloud leverages the same new and improved user interface introduced in EZConfig 4.1 and enables connection to a local Windows-based, PC-hosted scanner from a browser anywhere in your environment.

EZConfig provides an HTML-5, platform independent browser-based utility that quickly modifies a scanner's settings to meet an organization's needs. Users may define and push out scanning configurations from multiple interfaces. EZConfig offers port-agnostic, automatic device detection, including USB keyboard mode (which accounts for 75%+ of scanner users).

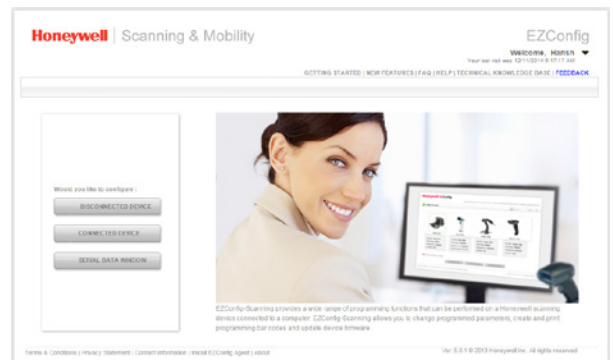

EZConfig users can easily compare device settings side-by-side and clone them to other devices. They are offered greater control of their configurations via real-time presentation of the changes they are making in the form of a "receipt", so that they can review before saving their modifications.

Lower Total Cost of Ownership and Reduced Carbon Footprint:

Minimize expenses related to costly service visits by emailing configuration barcodes instead of having technical support employees manually perform scanner configurations.

Register for Free Access Now!

Streamline your configurations' efficiency by registering now for free access to EZConfig for Scanning at www.ezconfig.honeywell.com.

Features

- **Configuration Simplicity:** EZConfig Cloud for Scanning's Graphical User Interface (GUI) offers a clean and intuitive user experience. Both basic and advanced users can easily perform configuration steps with ease.
- **Reduces Configuration Time:** EZConfig Cloud for Scanning offers port-agnostic automatic device detection and uses a HTML-5 platform-independent browser-based utility to easily detect ports of wired or even wirelessly connected scanners to enable connection and updating of the scanner.
- **Auto-Firmware Notification:** EZCS Cloud for Scanning automatically checks the firmware on any connected scanner for any available updates from Honeywell. Users may review the updates and easily apply the updates if desired.
- **Advanced Users:** The data formatting tab has been improved to simplify and expedite formatting changes. Changes can be made with minimal effort and shared easily with others via email or a configuration barcode. If one needs help during the process, EZConfig provides multiple links to useful resources such as online help files, tech support, feedback and more.

EZConfig Cloud for Scanning 5.0 Technical Specifications

EZConfig Application System Requirements

Operating System	Windows XP (SP3 and above), Windows 7 32/64 bit
Processor	2 GHz Pentium IV or faster equivalent processor; 3 GHz or faster (recommended)
Memory	1 GB of RAM or more; 2 GB of RAM or more (recommended)
Hard Disk	Approximately 100 Mb for Installation
Display	Super VGA (1024 x 768) or higher resolution video adapter and monitor
Network	IP Network Card (minimum Local loop IP address)
Browser	Chrome Version 30 above (or HTML 5 supported), Firefox Version 20 above (or HTML 5 supported), Internet Explorer 9, 10, 11

Communication Interfaces

Communication Interfaces	RS232, USB Serial, USB HID Barcode Scanner, USB HID Keyboard, USB HID SurePOS
---------------------------------	---

EZConfig 5.0 Supported Honeywell Scanner Devices

Devices Supported	Xenon™: 1900 family / 1902 (communications base) family / 1500 / 1912 (communications base) / 1900i Granit™: 1910i / 1911i, 1280i Voyager®: 1200g / 1202g (communications base) / 1250g / 1400g Hyperion™ 1300g Genesis™ 7580g Vuquest® 3310g Stratos® 2700 Document Reader 4850 OEM: N5600 / N4300 / N8600 / N7300 / 5X80 Communication Bases: CCB, CCB00, HAP
--------------------------	--

Note: For those users unable to access EZConfig Cloud for Scanning 5.0 please contact Honeywell Technical Support for assistance at www.honeywellaidc.com or download and use EZConfig for Scanning 4.5 there.
