CoPilot® Live™ Professional
Integrated satellite navigation services for the mobile workforce
CoPilot Live Professional – Overview

CoPilot Live Professional is a flexible platform of software and services enabling enterprises to deploy integrated, commercial grade turn-by-turn satellite navigation on Honeywell devices as part of a mobile workforce strategy.

Using the Honeywell device’s internal GPS chipset and storing all map data on-board, CoPilot Live Professional optimises performance and reliability while removing any reliance on data downloads for the purposes of navigation.

CoPilot Live Professional comprises a comprehensive Software Developer Kit (SDK) consisting of hundreds of APIs that provide seamless integration with field service and other line-of-business application on device, while maintaining a two-way data exchange with job management and tracking services at the corporate backend.

Map Coverage

Europe
Partnering with NAVTEQ, CoPilot Live and CoPilot Live Professional can support pan-European deployments with coverage of over 40 European countries, supporting 27 languages.

North America
ALK Digital Maps™ is comprehensive street mapping of North America, continuously updated for the transportation industry.

For full, global mapping coverage, visit copilotlive.com.

CoPilot Truck Professional - Overview

CoPilot Truck Professional offers the same flexible platform of integrated GPS navigation software and services with the addition of customisable truck-specific attributes, such as vehicle length, width, height and weight/axel weight.

It provides the optimal route for any itinerary, while automatically avoiding commercial truck restrictions and seamlessly integrating with other transportation management, tracking and scheduling systems.

*Requires a mobile internet connection
In addition to standard driver navigation, CoPilot Live Professional features include:

- Multi-stop trip planning and time window-based job re-sequencing
- CoPilot Truck routing & truck-specific attributes
- Connection to live traffic services*
- Integration with other line of business application stored on the Honeywell device

Integrated Navigation – The Business Benefits

- Reduces out-of-route mileage by approximately 5-10% annually
- Automates scheduling and navigation and ensures accuracy while saving tens of seconds per entry on a repetitive business task
- Improves back-office productivity by reducing field directional support
- Improves workforce efficiency through redirection of underutilised resources
- Enhances safety compliance by eliminating the use of paper maps while driving

ALK Technologies and Honeywell

As a certified partner, ALK Technologies is committed to developing and supporting the widest range of Honeywell devices.

Honeywell Device Support

As an original member of the Honeywell Android Developer program and a certified partner, ALK Technologies is committed to developing and supporting the widest choice of Honeywell devices.
