EasyCoder® Printer RFID Kit

Installation Instructions

Introduction

The RFID kit provides RFID functionality for EasyCoder® PX4i and PX6i printers. With this kit installed, the PX4i or PX6i printer can read and write to RFID tags.

These instructions describe how to install the following RFID kits:

- PX4i 915 MHz RFID Kit (P/N 50137977-001)
- PX4i 869 MHz RFID Kit (P/N 50137978-001)
- PX6i 915 MHz RFID Kit (P/N 50137979-001)
- PX6i 869 MHz RFID Kit (P/N 50137980-001)

For more information about using RFID features on the PX4i or PX6i, see the EasyCoder Printer RFID User's Guide (P/N 934-041-xxx).

Contents

- One of the following I/O interface boards:
  - I/O interface board with IM4 869 MHz radio module
  - I/O interface board with IM4 915 MHz radio module
- One of the following lower media guides:
  - PX4i lower media guide with RFID antenna
  - PX6i lower media guide with RFID antenna
- Dual slot I/O cable
- M3x5 screw (2)
- M4x5 screw
- Spacer screw
Requirements

- A PX4i or PX6i printer running Fingerprint v8.76.0 or later or IPL v2.76.0 or later. You can download the latest version of firmware from the Honeywell website at https://hsmftp.honeywell.com.
- A #T10 and a #T20 Torx screwdriver.
- A slotted screwdriver.

Installing the RFID Kit

**Warning:** The installation described in this section must only be performed by an authorized service technician. Honeywell assumes no responsibility for personal injury or damage to the equipment if the installation is performed by an unauthorized person.

**Follow ESD Procedures**

Follow standard ESD guidelines to avoid damaging the equipment you are servicing.

**Caution:** Before you begin, turn off the printer and disconnect the power cord and communication cables.

**Note:** This procedure applies to both the PX4i and PX6i. For simplicity, the PX4i is depicted in the illustrations.

1. Open the front door and right side door.
2. Remove the eight #T10 Torx screws and remove the left side door.

3. Release the lower media guide latch.
4. Carefully remove the lower media guide and upper media guide assembly.

5. Remove the upper media guide from the lower media guide.

6. Route the antenna cable from the RFID lower media guide through the opening in the print engine base. Make sure to route the cable in front of the label stop sensor (LSS) guide bar.
7. Slide the RFID lower media guide into the printer. Insert the pins on the guide into the holes on the print engine base.

8. Snap the RFID lower media guide into place.

9. Insert the upper media guide.

10. On the back of the printer, remove the two screws that secure the cover plate to slot 1 or slot 2, and remove the cover plate.

   Note: You need to use the first available slot on the printer starting from the left (slot 1).

11. Connect the dual slot I/O cable to the main board.
12. Connect the dual slot I/O cable to the RFID interface board. Use the connector 1 for slot 1 and connector 2 for slot 2.

13. Slide the RFID interface board into the printer.

14. Secure the RFID interface board with the two screws you removed in Step 9 or with the two included M3x5 screws.

15. Secure the RFID interface board to the circuit board with the M4x5 screw and spacer screw. For slot 1, use the spacer screw on the main board. For slot 2, use the spacer screw in the kit.

16. Connect the antenna cable to the RFID interface board.

17. Attach the left side door to the printer.

18. Close the front and right side doors.
