The Intermec IF2 is a compact, cost-effective network reader designed to support diverse RFID applications in both enterprise and industrial environments that require a scalable RFID system with a low cost per read point.

The IF2 is based on an Intermec-designed radio frequency (RF) platform that offers best-in-class read performance and includes support for Intermec’s exclusive Advanced RFID Extensions (ARX), helping customers achieve a new level of visibility to the identification of RFID tags for greater accuracy of reading tags of interest over readers utilizing less-versatile commodity chipsets.

Packaged in a small and lightweight, yet durable enclosure, the IF2 is suited for nearly any environment, including industrial warehouse and manufacturing operations and enterprise environments for asset and inventory management applications.

Reduced System and Deployment Costs for Large and Small Installations

With a focus on keeping the cost of ancillary equipment and installation low, the IF2 Network Reader includes features that reduce the costs and complexity of the overall solution.

Not only does the low-profile enclosure with integrated mounting slots allow the IF2 to be easily installed in virtually any environment, the IF2 also supports Power over Ethernet (PoE) for scalable deployments without the cost of adding electrical drops where AC line power is not available or practical. An optional DC converter is available to support conventional wall power. Either power method supports the full RF output power capability of the IF2 (up to 30 dBm).

Because the general purpose input/output (GPIO) circuitry can be powered directly through either PoE or the DC power converter, the IF2 allows for direct monitoring and controlling of peripherals such as presence detectors and signal lights without requiring extra devices and power supplies to facilitate the connection.

Further reducing installation and equipment costs, the IF2’s four antenna ports can be configured to transmit in either mono- or bi-static mode, increasing the flexibility of the system to achieve the best results for the application and environment. A variety of antennas from Intermec’s extensive product line supports diverse applications, versus integrated antenna readers that include one type of antenna and limit the flexibility of applications and deployment.

- Advanced performance in a compact and cost-effective design
- Easily deployed and managed on common networks
- Low cost per read point for superior ROI
- Choice of Power over Ethernet lowers cost of installation
- Directly monitors and controls peripherals without extra equipment
- Expanded memory option hosts applications written in Java®, JavaScript or C# .Net
- Factory configurable to operate in world regions supporting FCC or ETSI frequency bands

Intermec by Honeywell
Easy to Use and Manage
The IF2 supports standard network device protocols, including auto-
discovery and network service protocols, enabling seamless integration with
common network infrastructures.

Supporting the standards-based LLRP application interface, the IF2 can quickly
integrate with business solutions such as IBM® WebSphere® RFID and
Microsoft® BizTalk® RFID, providing a scalable standardized platform for
the development, deployment, and management of RFID solutions. The
IF2 also supports Intermec’s easy
to use Basic Reader Interface (BRI),
enabling Intermec customers and partners to quickly and seamlessly
include the IF2 in their solutions.

Intermec SmartSystems™ Foundation
allows administrators to change device
settings, send firmware upgrades, update
software applications, and execute other
changes on multiple devices directly from
a centralized console to save time and
cost for deploying, configuring, and
maintaining the Intermec hardware.

Intermec’s Advanced Services
can provide process analysis, site
analysis, installation and an 18-month
guarantee of system performance.

In support of global operations, the IF2 is
certified in regions across the globe and
is factory configured to operate in the
corresponding RFID frequency band.

General Description
The IF2 is a compact, cost-effective network
reader designed to support diverse passive
UHF RFID applications in both enterprise and
industrial environments. The IF2 supports Power
over Ethernet, four mono- or bi-static RF ports,
built-in powered general purpose input output
(GPIOD) control, and both standards-based LLRP
and Intermec’s easy to use Basic Radio Interface
(BRI) application interfaces, enabling scalable
low-cost deployments for improved return on
investment (ROI). The IF2 is packaged in a durable
enclosure for nearly any environment and is factory
configured to operate in regions across the globe.

Physical Characteristics
Length: 18.85 cm (7.42 in)
Length w/splashguard: 19.9 cm (7.87 in)
Width: 16.31 cm (6.42 in)
Height: 4.32 cm (1.70 in)
Weight: 1.0 kg (2.2 lbs)
LED Status Indicators: RFID service, power, PoE, Ethernet, tag detection, and
antenna port connection status

Environmental
Operating Temperature: -25 to 55°C (-13 to 131°F)
Storage Temperature: -30 to 70°C (-22 to 158°F)
Relative Humidity: 5% to 95% (non-condensing)
Enclosure: IP53 sealing
Die cast magnesium base, Lexan plastic cover

Connectivity
Communications: 10/100 BaseT Ethernet
RS-232, USB for configuration
Input Power: PoE (802.3at compliant)
DC power input (12 VDC +/-5%, 30W), sealed/
locking connection. Requires optional
Intermec 100/240 VAC converter.

General Purpose
Input/Output (GPIO): Four input (0-40 VDC)
and four output (0-48 VDC, 0.25 amp) circuits,
powered via PoE or DC input (500 mA, 12 VDC)

RF Characteristics
Antenna Connections: Four reverse-polarity (RP) TNC
ports configurable for mono- or bi- static operation.
Antenna fault detection and auto tuning for best
performance
Output Power: 1 to 30 dBm, configurable in 1 dB steps
(calibrated above 9 dBm)
Frequency Ranges: FCC (902–928 MHz) and
ETSI (865–868 MHz), factory configured

Software Platform
Passive UHF Tag Protocols:
ISO 18000-6C
EPCglobal UHF Class 1 Gen 2
Tag Features:
NXP G2X, Impinj Monza 4QT extensions
High memory tags (Fujitsu, Tego, ATA)
Host Application Protocols:
EPCglobal LLRP
Intermec Advanced RFID Extensions (ARX)
Intermec Basic Reader Interface (BRI)
Intermec Developer Library (IDL) resource
kit for BRI (Java, C# .NET)
Management and Configuration:
Bonjour
Universal Plug and Play (UPnP)
Intermec SmartSystems™ client
Intermec Web Services and Web Configuration Interface
Network Protocols:
HTTP/HTTPS Web Server
IPv4, IPv6
DHCP, DNS, NTP, Syslog

Optional Expanded Memory
Support for embedded C#.NET and Java applications
96 MB of flash application memory
96 MB of flash data storage
64 MB of available RAM

Security
FIPS 140-2 compliance for HTTPS, LLRP-secure,
and Web Services (DCWS)-secure
RADIUS client support
SSL Certificate support

Accessories
Intermec approved antennas, antenna cables

Regulatory Approvals and Compliance
Model: 1003FF01
Safety: IEC/UL 60950-1
EMC: Class B – FCC/ICES/EN
