The Xenon XP 1952h scanner delivers premium performance and class-leading durability for increased clinician productivity and maximum uptime – improving patient outcomes and lowering TCO.

The Xenon Extreme Performance (XP) 1952h scanner builds on the strong foundation of earlier Xenon healthcare scanners, continuing the tradition of industry-leading performance and reliability.

The Xenon XP 1952h healthcare scanner ensures that healthcare professionals remain focused on the patient, making the process of patient ID verification quick and easy. Incorporating Honeywell’s renowned imaging technology, the Xenon XP 1952h scanner offers superior scan performance, easily capturing even the most difficult-to-read or damaged codes. This helps to eliminate wasted movements and lost time, improving healthcare worker productivity and throughput.

Freedom of movement around patients, family members, and expensive equipment – particularly in congested patient rooms or ICUs – is a continued challenge for today’s clinician. As more and more technology is packed into the modern-day patient room, free space comes at a premium. The Xenon XP 1952h cordless scanner ensures nurses’ focus is on patient safety and comfort.

Engineered to 50 drops at 1.8 m (6 ft) and 2,000 tumbles at 0.5 m (1.6 ft), the Xenon XP 1952h scanner’s class-leading reliability reduces scanner downtime and service costs, leading to a longer lifecycle and lower total cost of ownership.
