Giving Your Distribution Center the COMPETITIVE EDGE

Today’s DC managers are under increasing stress to streamline their operations and enhance operational efficiencies. They face a myriad of pressures:

• Drive to cut operational costs
• Rise in omni-channel order fulfillment
• Fluctuating seasonal demand spikes
• Push to reduce high employee turnover
• Proliferation of SKUs

THE COST OF OUTDATED TECHNOLOGY AND INEFFICIENT PROCESSES

80% of DCs operate on outdated technology.

3K hours are lost per year in the average DC on inefficient processes

60% agree that huge savings can be achieved by cutting seconds off operational workflows

43% could be saved per year through process re-engineering and mobile technologies

$459K

THE NEED FOR BETTER TECHNOLOGY IN THE DC

84% think data capture technology has positively impacted their omni-channel strategy

40% say barcode scanners and mobile computers help generate more accurate inventory data

THE NEED FOR BETTER TECHNOLOGY IN THE DC

WHY CONNECTED WORKERS ARE BETTER

CONNECTED TECHNOLOGY

Makes a difference in the DC

CONNECTED TECHNOLOGY

Ergonomic, rugged, designed for the DC

MEANINGFUL ANALYTICS

Faster, more accurate, more efficient workflows

WHY CONNECTED WORKERS ARE BETTER

WHAT’S STOPPING THEM FROM IMPLEMENTING NEW TECHNOLOGY?

60% say cost is the biggest barrier

76% say cost is the biggest barrier

50%+ need to show ROI in 18 months

COMING SOON: CONNECTED WORKERS PART 2

We'll reveal how Connected Workers using Connected Technology can help increase efficiencies and reduce costs in the DC. Stay tuned!

CONNECTED TECHNOLOGY

MEANINGFUL ANALYTICS

• Faster, more accurate, more efficient workflows
• Insight to make better operational decisions
• Improved safety and ergonomics for DC workers
• A better-running business, and happier customers!

EMPOWERED EMPLOYEES ARE BETTER

80% want to improve quality, accuracy & flexibility

43% say high employee turnover is their biggest issue

Giving Your Distribution Center the COMPETITIVE EDGE

Connected Workers using Connected Technology streamline DC processes and enhance operational efficiencies.

RECEIVING
From Dock to Stock, at High Speed
• Improve dock-to-stock cycle time and accuracy
• Prevent costly cascading errors by ensuring accurate stock allocation
• Maximize efficiency with rapid, accurate scanning

CONNECTED WORKER SOLUTIONS

PUT-AWAY & REPLACEMENT
Accuracy and Efficiency in Vehicle-Based Workflow
• Monitor DC capacity and ensure accurate stock allocation
• Reduce dock-to-stock cycle time
• Enhance productivity of lift truck operators

CONNECTED WORKER SOLUTIONS

PICKING
Enhanced Worker Accuracy & Productivity
• Improve picking accuracy
• Reduce cycle time
• Increase productivity

CONNECTED WORKER SOLUTIONS

CYCLE COUNTING & INVENTORY
Increased Inventory Accuracy in Real Time
• Interleave cycle counting with picking to save travel time and labor
• Increase efficiency; fewer workers needed
• Reduce risk of injury

CONNECTED WORKER SOLUTIONS

PACKING, LOADING & SHIPPING
Pallet, Case or Piece. Dispatch Goods Faster and on Time
• Greater efficiency: more orders, on-time and error-free
• Eliminate extra routes
• Reduce damage claims and returns

CONNECTED WORKER SOLUTIONS
