ScanPal™ Enterprise Hybrid Device (EHD)

EDA 7.0-0

EDA 7.0-3

Quick Start Guide

ScanPal™ Enterprise Hybrid Device

Main battery (3.8V, lithium ion battery)
Regulator sheet.

Remarks:
If you ordered accessories for the terminal, please make sure they are also included in the package; be sure to keep the original packages for ScanPal™ EDA70 to be returned for repairing when necessary.

Note:
End users should not arbitrarily replace the operating system with other operating systems. To update operating system installed on your device, you need to get license from the OS vendors.

 Edmund.htm

Please follow the steps below to install the battery.
1. Press down the battery cover safely button to move the battery cover safety lock to the unlock position at right;
2. Open the battery cover with the battery cover buckle handle;
3. Insert the battery (insert the non-connector side first, then press the battery down to establish connection between the battery and the phone);
4. Press down the battery cover (insert the non-connector side first, then press the battery cover down);
5. Press down the battery cover safely button to move the battery cover safety lock to the lock position at left.

Remarks:
Refer to the illustrated installation steps on the following page.
Charging / Sync

Charging
1. Insert the ScanPal™ EDA70 to the USB cradle (or the single cradle);
2. Connect the USB cradle (or the single cradle) to the power adapter;
3. Make sure the replaceable adapter plug is plugged into the power adapter;
4. Connect the power adapter to the wall plug and start charging for ScanPal™ EDA70.

Get ScanPal™ EDA70 charged for at least 4 hours before using it, subject to your battery models.

Using the terminal while charging will significantly extend the time required for fully charged.

Suspend / Wake Up the Terminal

Suspend / Wake Up the Terminal
Press the power button and then release (less than 2 seconds)
To wake up the device from sleep mode, press the power button and then release (less than 2 seconds)

Install memory card
1. Power off;
2. Press down the battery cover safety button to move the lock to the unlock position at right;
3. Open the battery cover with the battery cover buckle handle;
4. Pull out the battery (First open the battery connector side, then pull out the battery);
5. Insert the SD card to SD card slot until it clicks;
6. Insert the battery (Insert the non-connector side first, then press the battery down to establish connection between the battery and the phone);
7. Press down the battery cover (Insert the non-connector side first, then press the battery cover down);
8. Press down the battery cover safety button to move the battery cover safety lock to the lock position at left;

ScanPal™ EDA70 Power Indicator

The status of power indicators in non-charging and charging process are illustrated as below:

<table>
<thead>
<tr>
<th>Non-charging process</th>
<th>Charging process</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Charging process</td>
</tr>
<tr>
<td>Constant green</td>
<td>Charging complete</td>
</tr>
<tr>
<td>Flashing green</td>
<td>Charging process, and the charging is about to be completed</td>
</tr>
<tr>
<td>Orange</td>
<td>During charging process, and the battery power is still low</td>
</tr>
<tr>
<td>Flashing red</td>
<td>Battery power is abnormal</td>
</tr>
</tbody>
</table>

Remarks:
If it’s recommended to use Honeywell’s peripherals, batteries, USB charging cables and power adapters. Damages caused by using non-Honeywell peripherals, batteries, USB charging cables or power adapters are not covered by the warranty.

Warnings:
Please make sure all kits are dry when use the terminal and battery with other accessories.

Damage caused by using wet kits may not be covered by the warranty.

Use Scan Engine
Align the aiming beam with the barcodes, and adjust the angle between the beam and the barcodes to get the best results.
The recommended range from the terminal to the barcodes is 4” to 10” (10cm to 25cm)
1. Click the demo application on the interface, and then select Scan demo program;
2. Click Scan on the screen or press the Scan Button;
3. Align ScanPal™ EDA70 with the barcodes;
4. Adjust the aiming beam: in order to obtain the best performance, avoid scanning in a slight angle and slowly move the beam on the barcodes by scanning the reflection of the barcodes;
5. The terminal will beep when the barcodes are successfully decoded, which means the information included in the barcode has been obtained by the terminal.

Aiming Beam

The aiming beam gets narrower when the terminal gets closer to the barcodes, while it gets wider when the terminal gets farther from the barcodes.
The smaller the barcodes, the closer the aiming beams should get to the barcodes.
The bigger the barcodes, the farther the aiming beams should get to the barcodes.

Beam positions when scan 2D images
