Granit 1981i
Industrial Full Range Wireless Area-Imaging Scanner

Quick Start Guide
Note: Refer to your user's guide for information about cleaning your device.

For localized language versions of this document, go to www.honeywellaidc.com.

**Getting Started**

Turn off the computer's power before connecting the base, then power up the computer once the base is fully connected. When the base is connected and powered up, put the scanner in the base to establish a link. The green LED on the base flashes to indicate the scanner's battery is charging.

**Power Supply Assembly (if included)**

![Power Supply Assembly](image)

Note: The power supply must be ordered separately, if needed.
Connecting the Base

Keyboard Wedge:

RS232 Serial Port:
**Reading Techniques**

**Near Distance Scanning**

Use the red lighting and center the box over the bar code when scanning at a near distance (less than 11.8 inches / 30 cm). The laser aimer will be to the right of the center of the bar code.

**Far Distance Scanning**

Use the laser aimer and aim at the center of the bar code when scanning at a far distance (up to 50 feet / 15.2 meters). When scanning at far distances the red lighting may not be apparent.

If the bar code is highly reflective (e.g., laminated), you may need to tilt the scanner at an angle so the bar code can be scanned.

*Note:* If the scanner beeps 3 times when scanning a bar code, the link has not been established. If the scanner beeps once, the link has been established.
Standard Product Defaults

The following bar code resets all standard product default settings.

USB Serial

Scan the following code to program the scanner to emulate a regular RS232-based COM Port. If you are using a Microsoft® Windows® PC, you will need to download a driver from the Honeywell website (www.honeywellaidc.com). The driver will use the next available COM Port number. Apple® Macintosh computers recognize the scanner as a USB CDC class device and automatically use a class driver.

Note: No extra configuration (e.g., baud rate) is necessary.

USB PC Keyboard

Scan the following code to program the scanner for a USB PC Keyboard.
**Keyboard Country**

Scan the **Program Keyboard Country** bar code below, then scan the numeric bar code(s) from page 13, then the **Save** bar code to program the keyboard for your country. As a general rule, the following characters are not supported by the scanner for countries other than the United States:

@ | $ | # | { | } | [ | ] | = | / | ' | \ | < | > | ~.

---

**Program Keyboard Country**

**Save**

*Note: For a complete list of country codes, see the User's Guide for your product at our website, [www.honeywellaidc.com](http://www.honeywellaidc.com).*
**Locked Link**

If you link a scanner to a base using the Locked Link Mode, other scanners are blocked from being linked if they are inadvertently placed into the base. If you do place a different scanner into the base, it will charge the scanner, but the scanner will not be linked.

To use a different scanner, you need to unlink the original scanner by scanning the **Unlink Scanner** bar code.

**Override Locked Scanner**

If you need to replace a broken or lost scanner that is linked to a base, scan the **Override Locked Scanner** bar code with a new scanner, and place that scanner in the base. The locked link will be overridden; the broken or lost scanner’s link with the base will be removed, and the new scanner will be linked.

**Unlinking the Scanner**

If the base has a scanner linked to it, that scanner must be unlinked before a new scanner can be linked. Once the previous scanner is unlinked, it will no longer communicate with the base. Scan the **Unlink Scanner** bar code to unlink a scanner.
**Aimer Delay**

Set the time between when the trigger is pulled, turning the laser aimer on, and when the picture is taken. During the delay time, the laser aimer appears so you can find the bar code. When the delay is over the LEDs turn on and the scanner reads the bar code. This can be helpful when reading at far distances.

![Aimer Delay Off](image)

*Note:* For more options, see the User’s Guide for your product at our website, [www.honeywellaidc.com](http://www.honeywellaidc.com).
Suffix

If you want a carriage return after the bar code, scan the **Add CR Suffix** bar code. To add a tab after the bar code, scan the **Add Tab Suffix** bar code. Otherwise, scan the **Remove Suffix** bar code to remove the suffixes.

---

**Add CR Suffix**

**Add Tab Suffix**

**Remove Suffix**

Add Code ID Prefix to all Symbologies

Scan the following bar code if you wish to add a Code ID prefix to all symbologies at once.

---

**Add Code ID Prefix To All Symbologies**

(Temporary)

Note: For a complete list of Code IDs, see the User’s Guide for your product at our website, www.honeywellaidc.com.
**Function Code Transmit**

When this selection is enabled and function codes are contained within the scanned data, the scanner transmits the function code to the terminal. Charts of these function codes are provided in your User's Guide. When the scanner is in keyboard wedge mode, the scan code is converted to a key code before it is transmitted.

Disable
Data Format Editor Instructions

The following are abbreviated instructions for entering a data format. For complete instructions refer to your User’s Guide, available at our website, www.honeywellaidec.com.

1. Scan the Enter Data Format symbol.
2. Primary/Alternate Format: scan 0 for Primary Format
3. Terminal Type: scan 099 for any terminal type
5. Length: scan 9999 for any length bar code.
6. Editor commands: use the Programming Chart that follows.
7. Scan Save to save your entries.
Programming Chart
**EZConfig-Scanning**

To access additional features for the scanner use EZConfig-Scanning, an online configuration software tool, available from our website at [www.honeywellaidc.com](http://www.honeywellaidc.com).

**Technical Assistance**

Contact information for technical support, product service, and repair can be found at [www.honeywellaidc.com](http://www.honeywellaidc.com).

**Limited Warranty**

Refer to [www.honeywellaidc.com/warranty_information](http://www.honeywellaidc.com/warranty_information) for your product’s warranty information.

**Patents**

For patent information, refer to [www.hsmpats.com](http://www.hsmpats.com).

**User Documentation**

For localized versions of this document, and to download the User's Guide, go to [www.honeywellaidc.com](http://www.honeywellaidc.com).
