Out of the Box

Make sure that your shipping box contains these items:

- Dolphin 75e handheld computer (terminal)
- 1GB, 2GB, or 4GB industrial grade microSD™ card (optional)
- Rechargeable 3.7V Li-ion battery
- USB charge/communication cable
- Power adapter with regional plug adapters
- Product documentation

If you ordered accessories for your terminal, verify that they are also included with the order. Be sure to keep the original packaging in case you need to return the Dolphin terminal for service.

Memory Card Specifications

Honeywell recommends the use of Single Level Cell (SLC) industrial grade microSD or microSDHC™ memory cards with Dolphin terminals for maximum performance and durability. Contact a Honeywell sales representative for additional information on qualified memory card options.
Dolphin 75e Features

- Microphone
- Scan Button
- Battery Status / Notification LED
- Right Scan Button
- USB Door / Micro USB Port
- Start Button
- Administrator or Developer Definable Button
- Back Button
- Touch Panel
- Front Speaker
- Search, Cortana® or Bing® Access
- Scan Status LED
- Microphone
- Bottom Speaker
- Scan Button
Install the Battery

Dolphin 75e models are designed for use with battery part numbers BAT-STANDARD-02 (Li-ion 3.7 V, 6.179 watt hour) and BAT-EXTENDED-02 (Li-ion 3.7 V, 12.358 watt hour), manufactured for Honeywell International Inc.

The Dolphin 75e is shipped with the battery packaged separately from the terminal. Perform the steps illustrated below to install the battery.

⚠️ Ensure all components are dry prior to placing the battery in the terminal. Mating wet components may cause damage not covered by the warranty.

Note: Standard model battery and battery door shown.

Apply pressure to the edges of the battery door before engaging the lock to ensure the door is properly closed.

⚠️ We recommend use of Honeywell Li-ion battery packs. Use of any non-Honeywell battery may result in damage not covered by the warranty.
**Charge the Dolphin 75e**

Dolphin terminals ship with the battery significantly discharged of power. Charge the battery with a Dolphin charging device for a minimum of 4 hours for the standard battery and 6 hours for the extended battery.

When using the USB cable supplied to charge the terminal via a 500mA USB port on a host device, charge the battery for a minimum of 6 hours for the standard battery and 8 hours for the extended battery.

**Factors that Affect Charge Times**

- Using the terminal while charging the battery increases the time required to reach a full charge.
- If the terminal is drawing more current than supplied by the charging source, charging will not take place. For additional information, see the user's guide.

⚠️ We recommend use of Honeywell peripherals, power cables, and power adapters. Use of any non-Honeywell peripherals, cables, or power adapters may cause damage not covered by the warranty.

Dolphin 75e model terminals are designed for use with the following charging devices and cables: 70e-HB, 70e-EHB, 70e-CB, 70e-NB, 70e-MB, 70e-MC, and the 70e-USB ADAPTERKIT.

⚠️ Ensure all components are dry prior to mating terminals/batteries with peripheral devices. Mating wet components may cause damage not covered by the warranty.

**HomeBase (Model 70e-HB)**

The 70e-HB charger is designed for use with Dolphin 75e model terminals, and battery part numbers BAT-STANDARD-02 (Li-ion 3.7V, 6.179 watt hour) and BAT-EXTENDED-02 (Li-ion 3.7V, 12.358 watt hour) manufactured for Honeywell International Inc.

Use only a UL Listed power supply that has been qualified by Honeywell with output rated at 12VDC and 3 amps with the device.
### HomeBase Parts

- **AUX Battery Well**
- **USB Port**
- **COMM LED**
- **Dock LED**
- **AC Power Cord**
- **Power Adapter**
- **Power Cable**

### HomeBase LED Indicators

- **AUX battery LED**
  - Orange: The auxiliary battery is charging.
  - Green: The auxiliary battery has completed charging and is ready for use.

- **Dock LED**
  - Blue: The terminal is properly seated in the base.

- **COMM LED**
  - Green: A USB connection is established with the host workstation.
USB Charge/Communication Cable (70e-USB ADAPTERKIT)

The USB Charge/Communication cable provides two options for charging the terminal. Use the cable in conjunction with the provided power supply adapter and plug adapter to charge the terminal from a power outlet or connect the cable to a high-power USB port to charge from a host device.

Option 1: Charging from a power outlet

Use only a UL Listed power supply, which has been qualified by Honeywell with an output rated at 5VDC and 1A with the device.

Option 2: Charging from a high-power USB port on a host device

For important information about charging, see “Factors that Affect Charge Times”.
First Time Consumer Setup

1. Press the **Power** button.

2. Select a language, and then touch **Next**.

3. Select your region, and then touch **Next**.

4. Touch **Cancel** to bypass the advanced provisioning options and access the consumer setup.

5. Follow the on screen prompts for setting up the terminal, your WiFi connections, and creating a Microsoft® account (optional). To learn more about what you can do with a Microsoft account, go to https://account.microsoft.com/about.

About the Start Screen

On **Start**, swipe left to access the **Apps list** or scroll to the bottom of the screen and touch **All apps**. To learn how to customize the **Start** screen, see the user's guide.
**Turn Power On/Off**

To turn the terminal **On**, press and release the **Power** button.

To turn the terminal **Off**:
1. Press and hold the **Power** button.
2. When the message, “slide down to power off” appears, release the button and swipe down toward the bottom of the screen.

*Note: You should always power off the terminal before removing the battery.*

**Lock Screen and Sleep Mode (Suspend Mode)**

To save battery power, the touch panel display dims, and then turns off after a period of inactivity. If the display stays off longer than the set time limit, the terminal enters sleep mode.

1. Press and release the **Power** button to wake the terminal.
2. Swipe up from the bottom of the screen to unlock the terminal.

To adjust the time out limits:

1. Touch **Settings** on the **Apps list** screen.
2. Select **Personalization** > **lock screen** to adjust the display time out limit or select **Extras** > **sensor settings** to adjust the sleep time out limit.

**Turn Airplane Mode On/Off**

1. Swipe down from the top of the touch screen to open the quick settings.
2. Select **Expand**.
3. Touch **Airplane mode** to toggle the mode On or Off.

*Note: When Airplane mode is turned On, ✈️ shows on the status bar.*
**Remove the Battery**

1. **Power Off** the terminal.
2. Perform the steps illustrated below to remove the battery.

**Install a Memory Card**

*Note: Format microSD/SDHC card before initial use.*

1. **Power Off** the terminal.
2. Unlock and remove the battery door.
3. Pull the battery latch back and remove the battery.
4. Lift the card retention flap.
5. Slide the card (contacts facing down) into the socket, and then close the retention flap.
6. Install the battery and battery door, and then engage the lock.
7. Press the Power button ☺.
### Navigation and Function Buttons

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>🔄 Back</td>
<td>Return to the previous screen or press and hold to open the App switcher.</td>
</tr>
<tr>
<td>🔒 Administrator or Developer Defined</td>
<td>By default, no function is assigned to this button. For information on advanced tools and resources for IT professionals, go to <a href="https://technet.microsoft.com">https://technet.microsoft.com</a>.</td>
</tr>
<tr>
<td>🔍 Scan</td>
<td>Wake the terminal from <em>Sleep</em> mode. Trigger the scanner/imager.</td>
</tr>
<tr>
<td>🔍 Search</td>
<td>If <em>Cortana</em> is turned Off, press to search the terminal and Web using <em>Bing</em> or press and hold to activate <em>Speech</em> for voice commands. If <em>Cortana</em> is turned On, press to ask a question or initiate a voice command. To learn more about <em>Cortana</em>, go to <a href="http://www.windowsphone.com">www.windowsphone.com</a>.</td>

<tr>
<td>🌟 Start</td>
<td>Return to the <em>Start</em> screen.</td>
</tr>
<tr>
<td>🔜 Right &amp; Left Side</td>
<td>Trigger the scanner/imager.</td>
</tr>
<tr>
<td>🔊 Volume</td>
<td>Raise or lower the volume of the active speaker.</td>
</tr>
</tbody>
</table>

*Note: Additional functionality varies according to the application in use.*
Scan a Bar Code with the Scan Demo

1. In the Apps list, touch ScanDemoW10.

2. Point the terminal at the bar code.
   
   Note: For optimum performance, avoid reflections by scanning the bar code at a slight angle.

3. Touch Scan on the touch screen or press and hold one of the Scan buttons. Center the aiming beam over the bar code.
   
   The decode results appear on the screen.

About the Aiming Beam

The terminal projects an aiming beam that should be centered over the bar code, but it can be positioned in any direction for a good read.

The aiming beam is smaller when the scanner is closer to the code and larger when it is farther from the code. Hold the scanner close to smaller bar codes, and farther away from large bar codes to get a proper read.

If the bar code is highly reflective (e.g., laminated), you may need to tilt the scanner at an angle so the bar code can be scanned.

Linear Bar Code

2D Matrix Symbol
How to Use the Color Camera

1. In the Apps list, touch Camera.

2. Select either single photo mode or video mode in the viewfinder.

3. Point the camera lens at the object you want to capture. The camera lens is located on the back panel of the terminal.

4. To take a photo, touch . To record video, touch to start recording. When you are finished recording, touch the video icon again to stop.

5. To view your captured photo or video, touch the preview in the upper right corner of the screen.

Sync Data with a Computer

To sync files between your terminal and computer:

1. If you have a computer running Windows® 10, open the Phone Companion app from Start > All apps.

   If your have a computer running Windows 8 or Windows 8.1, the Windows Phone® app automatically opens when you connect the terminal to the computer using the USB charge/communication cable supplied.

   If you have a computer running Windows 7 or Mac, go to www.windowsphone.com to download and install the Windows Phone app for desktop or Mac.

2. In the Phone Companion app, select Windows as your terminal platform, and then set your sync preferences.

   In the Windows Phone app, set your phone name and sync preferences. You can always modify your preferences later by selecting Settings.
To move files between your terminal and computer without using an app:

1. Connect the terminal to the computer using the USB charge/communication cable.

2. Depending on the Windows operating system, either open File Explorer or Windows Explorer.

3. Under Computer, click on Windows Embedded Handheld > Phone.

4. You can copy, delete and/or move files or folders between the PC and the terminal or the microSD card installed in the terminal as you would with any other storage drive (e.g., cut and paste or drag and drop).

**Restart the Terminal**

You may need to restart the terminal to correct conditions where an application stops responding to the system or the terminal seems to be locked up.

- Press and hold the Power button. When the message, “slide down to power off” appears, release the button and swipe down toward the bottom of the screen. Press the Power button to turn the terminal back on.

To perform a restart if the touch panel display is unresponsive:

- Press and hold the Power button down for approximately 13 seconds. The terminal automatically restarts.

**Reset the Terminal**

For information on how to perform a Factory Reset (Clean Boot), see the user’s guide.
