Genesis 7580g
Area-Imaging Scanner

The Honeywell Genesis™ 7580g, the world’s first presentation area-imaging scanner engineered to decode all standard 1D, PDF, and 2D codes, provides enhanced productivity and revolutionary imaging technology in an elegant, yet durable design.

Powered by Adaptus™ imaging technology, the Genesis 7580g scanner redefines industry standards for imaging solutions. Breakthrough performance and a versatile form factor make this product suitable for environments ranging from manufacturing to healthcare to retail POS. Aggressive reading of barcodes on highly reflective surfaces, such as mobile phone screens, eliminates the need to purchase additional specialty hardware.

Patented CodeGate™ technology along with an activation button support menu-scanning and other targeted-scanning applications. Automatic cable detection and configuration simplifies migration to a new interface by eliminating the need to scan programming barcodes. Three additional patented technologies augment the Genesis 7580g scanner’s unmatched feature set:

- Shielded LEDs minimize the intense flashing common among other area imagers.
- CodeSelect™ allows the Genesis 7580g scanner to capture up to 15 barcodes in a single flash and output data in any predetermined order.
- TotalFreedom™ expands scanner functionality by allowing decoding and formatting plug-ins to be loaded directly onto the scanner, enabling enterprises to rapidly support proprietary or newly developed symbologies.
