Combining the latest printing innovations into a compact, rugged package, the PD43 series is ideal for use in tight spaces, on shallow countertops, or in pull-out cabinets.

The PD43 and smaller PD43c series of light industrial thermal printers incorporate the latest printing innovations into a compact and affordable solution designed to deliver uncompromising print performance in the smallest possible footprint.

Suited for the distribution center and warehouse, as well as airline passenger service, the PD43 upholds the long tradition of the PD series. An all-metal chassis, strong cast aluminum print mechanism, and tool-free printhead and roller replacement help minimize downtime and maintenance needs. With a variety of door options, the PD43 can support a wide range of media, including link-in and link-out ribbons with half-inch or one-inch core sizes – enabling maximum time between media resupply. Fast-time-to-label and print speeds of up to 200 mm/s (8 ips) ensure that the PD43 can scale with the changing needs of dynamic operations.

The PD43 takes industrial printing to a new level of simplicity, with a color graphic display that makes it easier to set up, configure and fine-tune settings without the need for a host computer. In fact, with Smart Printing capabilities, the PD43 can run apps right inside the printer – eliminating the need for a connected PC entirely.

Considering the switch to PD43 series from another printer brand? With comprehensive command language support - including ZSim2, our fast, friendly, and complete ZPL II® emulation - updating to the PD series has never been easier.

Add a service plan from Honeywell Repair Service and ensure business continuity, workflow performance and protection of your technology investments - now available in more than 70 countries with global pricing and global standards of quality.
