Built on the Honeywell Mobility Edge platform and Android, the ultra-rugged CN80 mobile computer combines touchscreen and keypad data input, real-time connectivity, and advanced data capture for industry-leading investment protection.

**CN80 Mobile Computer**

Logistics, warehouse, and field mobility organizations alike are transitioning from devices built on Windows® to devices built on Android™ and from keypad-centric devices to full touchscreens. But many legacy applications have not yet been updated for this new touch-centric world and for many use cases, keys remain essential for data capture.

Fortunately, there’s one ultra-rugged mobile computer that helps bridge the gap. The CN80 device offers both a large touchscreen and a choice of numeric or QWERTY keypad, allowing users to pick the best input method for their environment today, and also be ready for the touch-centric applications of the future.

Built on the Mobility Edge™ platform, the CN80 device offers an integrated, repeatable, and scalable approach based on a common hardware and software platform – unleashing customers from constraints faced today around integration and inflexible technologies without sacrificing enterprise security, reliability, performance, or management features.

Juggling multiple devices across the enterprise introduces time- and cost-intensive complexities for Enterprise IT to manage and maintain. The Mobility Edge platform enables customers to accelerate provisioning, certification, and deployment across the enterprise. The CN80 device offers an extended product lifecycle across five generations of Android to maximize return on customer investment and provide a lower overall TCO. And it’s validated by Android Enterprise Recommended, a Google-led initiative that helps businesses confidently select, deploy, and manage the Android devices and services best suited to their enterprise needs.

The ultra-rugged CN80 mobile computer features a fast processor, advanced network connectivity, and enhanced 1D/2D scanning plus extended battery life lasting twice as long as previous generations to keep workers connected and productive throughout multiple shifts. The large, vivid, 106.7 mm (4.2 in) touchscreen display can be read easily indoors and out and used with finger, glove, or stylus – making it ideal for warehouse, cold storage, field mobility, and other challenging environments.

**FEATURES & BENEFITS**

- **The Mobility Edge**
  - The Mobility Edge hardware platform and enterprise lifecycle tools drive an integrated, repeatable, scalable approach for accelerated and secure development, deployment, performance management, and lifecycle management.

- **The CN80 device**
  - The CN80 device provides future-proof investment protection with support for five Android generations, starting with Android 7.1 (N). Security updates are also available for up to two years past the last Google patch through Honeywell Sentinel.

- **The large touchscreen**
  - The large touchscreen with a 23-key numeric or 40-key QWERTY keypad supports both legacy key-centric applications and newer touch applications. Keypads allow input in extremely harsh environments and optimize efficiency in all environments.

- **Ultra-rugged construction**
  - Ultra-rugged construction withstands 3.0 m (10 ft) drops to concrete per MIL-STD 810G and 2,000 1.0 m (3.3 ft) tumbles. IP65/IP67 ratings against dust/water spray. Cold storage and non-incendive options support operation where other products can’t be used.

- **Enhanced 1D/2D scanning/data capture**
  - Enhanced 1D/2D scanning/data capture with read ranges of 0.15 m to 15.2 m (6 in to 50 ft) typically required in today’s warehouses. Optional scan handle for flexibility to switch between handheld and pistol grip operations.
